

# SUPRANITE® 650 PACKING

# **ADVANTAGES**

Easy and quick installation thanks to its tape in SUPRANITE ® PACKING 850.

## **CONSTRUCTION-COMPOSITION**

**SUPRANITE ® PACKING 650** is constructed from a structure based on specific mineral fibres - not included in the refractory ceramic fibres. Exempt from any carcinogenic classification according to the European Directive 97/69/CE.

SUPRANITE ® PACKING 650 is made with SUPRANITE ® PACKING 850 tape vulcanized for mechanical resistance and contains in its core the SUPRANITE @ PACKING 600.

SUPRANITE @ PACKING 600 is braided with calcium silicate fibres (maximum service temperature 750°C) with high-temperature coating. With its unique twisted structure, the SUPRANITE @ PACKING 600 has the following advantages: high compressibility, good elastic recovery, high density, excellent body tightness.

SUPRANITE @ PACKING 850 is made with fibres based on calcium silicate (maximum service temperature 750°C) and does not loose volume in temperature.

### **TECHNICAL CHARACTERISTICS**

Maximum Temperature in Service (°C)

600°C(\*)

(\*): For high-temperature applications, contact us directly.

### **MANUFACTURING**

Customised manufacturing on request.

### **APPLICATIONS**

**SUPRANITE ® PACKING 650** can be used in seals on furnace doors, boilers, visbreakers, co-boilers, ...

### INDUSTRIES CONCERNED

Chemicals Petrochemicals / Refining

Metallurgy / Iron- & Steel-making

### **EASY AND FAST INSTALLATION**

Well suited for use with the flat surfaces

No deterioration of the tape during its setting up, due to perforations in the installation

**Door Angle with Junction** 

No required cutting for each angle: only one by door is needed.
